DBO2 ANNOUNCES 30-DAY FREE TRIAL OF SAFETY NET

Leading Provider in the Measurement and Management of Risk Indicators
Announces Limited Time Offer

SAN CARLOS, CALIF. (May 12, 2009) – DBO2 announced the availability of a [30-day trial](#) of SafetyNet for professionals seeking to predict and prevent incidents on their worksites.

[DBO2 SafetyNet](#) helps customers predict and prevent loss by enabling them to identify and address worksite risk. Last year, over 11,000 SafetyNet users in the construction, manufacturing, utilities, oil & gas, and insurance industries gathered millions of observations using mobile devices such as BlackBerries and Pocket PCs. Once gathered, these observations provide customers with unprecedented visibility into worksite practices, helping to identify trends for at-risk conditions and behaviors, and to pinpoint contractors and worksites that may be at risk. In the past eight years, DBO2 customers have documented the prevention of thousands of injuries, saved millions of dollars, and won numerous awards as a result of implementing the service.

“We are eager to help others in their quest to eliminate injuries and death in the workplace.” says Barry Nelson, CEO of DBO2. “This 30-day trial of SafetyNet should serve as an impetus for those who’d like to start predicting and preventing incidents immediately.”

Interested parties should visit <http://dbo2.com/trial> to sign up for this limited time offer, which is valid until June 15, 2009. Some restrictions apply.
